DE 19902260	C2			F02M-051/00	

Abstract (Basic): DE 19902260 A

The drive has a piezoelectric actuator (2) with a base plate (24) in a first housing section, a servovalve (3) in a second housing section, a coupling between the base plate and servovalve and a membrane (6) between the base plate and the housing inner wall and between the first and second housing sections to achieve sealed separation of the two sections.

The base plate has an annular groove (243) in the base surface facing the second section with a ring seal (74) on which the membrane rests, whereby the membrane is retained on the base surface by a flat element.

USE - Common rail fuel injection valve.

ADVANTAGE - Actuator is reliably protected against leakage by membrane with long operating life.

Dwg.4/4

Title Terms: POSITION; DRIVE; FUEL; INJECTOR; BASE; PLATE; ANNULAR; GROOVE; BASE; SURFACE; FACE; SECOND; HOUSING; SECTION; RING; SEAL; MEMBRANE; REST ; MEMBRANE; RETAIN; BASE; SURFACE; PLAT; ELEMENT
